

Houston Police Department
Midwest Division
Captain David J. Williams

Welcome to the city's newest Police Station.

Welcome to Houston's newest police facility. This building was purchased by the city of Houston in November of 2007. A former business college, the 60,000 square foot building was completely remodeled into one of the finest facilities in the city. The purchase and renovation was a two-year project, with actual operations from the facility beginning on March 1, 2010.

This facility houses 159 officers and civilians assigned to Midwest patrol, as well as two Narcotics squads and one Investigative First Responder (I.F.R.) squad. There is additional furnished space ready to house two more investigative squads, as well as 20,000 square feet of unfinished space for future growth.

Midwest has a large public meeting room which doubles as an in-service training room and was designed to seat up to 80 persons. Our officers have an outstanding gym facility, as well as full-size lockers for each employee. Midwest also has a jail lock-up for class C prisoners, which reduces the amount of time officers are out of service on minor arrests. There are separate men's and women's down rooms, for officers to rest prior to attending court, along with a break room and kitchenette.

The facility is equipped with a large emergency generator, an ice machine, and hurricane supplies, allowing the facility to operate during natural or man-made disasters.
